

Checking Encryptions Keys on Tetra Lane Series

1. Power on device
2. Let the device initialize the software boot fully
3. Once the device is all the way booted, please press 2634 in sequence. 4. The device will now prompt you to press the F button. Please do so

5. Please proceed to the "TSA" option and press enter (or in the case of touch screen devices, tap TSA)
6. From here you will press 4 on the keypad to display the DUKPT KSN

7. Now you will see the different key slots of the device
 - a. Please take an image or record the first 10 characters of the keys that are occupying slot 0 (DUKPT0) and slot 4 or 5 (DUKPT4/5)
 - b. *Please note that you may have to scroll down to see slot 4 & 5 on the device.
 - c. *Sometimes no key will be found in either Slot 0, 4, or 5. This is ok. Please just move to step 8

8. Please report your findings back to NewBold Technical Support Team.
